

# StockTakeOne®

## StockTakeOne

e-Motion has re-Invented the stock take by creating StockTakeOne.

StockTakeOne is a state of the art Inventory control program using WiFi technology to continuously be on-line with the backend database.

With StockTakeOne Stock Control becomes as efficient as pleasant.

StockTakeOne data is continuously checked and updated on the fly: add new items, new barcodes; modify prices, storage locations etc. This could be done either from the handheld terminal or from the backend monitor.

## Discover the advanced features:

- simultaneous multiple controllers
- live monitoring of all the controllers
- on-line consolidated stock take
- on-line discrepancy report
- on-line settings
  - data grouping criteria
  - users/controllers prerogatives
  - locking sessions
- entry log with detailed data entry sequence
- messaging between the monitor and the controllers
- barcode manipulation before searching
- auto-enter (one scan, one entry); default quantity is settable
- location barcode auto-detection
- multiple variants criteria (per item) handling
- ...

## Multiple Purpose Software

StockTakeOne is so comprehensive that it is also very valuable in almost all stock movements:

- store reception
- store issuing
- store waste control
- replenishment
- ordering
- labeling
- ...

## Efficiency

With StockTakeOne say goodbye to waste of time

- no more data download,
- no more data upload,
- no more delayed reports,
- ...
